Отчет по SQL: Новиков А А

Этап 1: Создание таблиц

```
CREATE TABLE authors (
    author_id SERIAL PRIMARY KEY,
    author_name VARCHAR(100) NOT NULL
);

CREATE TABLE books (
    book_id SERIAL PRIMARY KEY,
    title VARCHAR(200) NOT NULL,
    publication_year INT,
    author_id INT REFERENCES authors(author_id)
);
```

Этап 2: Наполнение данных

```
INSERT INTO authors (author_name)
VALUES
('Лев Толстой'),
('Федор Достоевский'),
('Александр Пушкин');

INSERT INTO books (title, publication_year, author_id)
VALUES
('Война и мир', 1869, 1),
('Преступление и наказание', 1866, 2),
('Евгений Онегин', 1833, 3);

INSERT INTO authors (author_name)
VALUES ('ВАШЕ ИМЯ');

INSERT INTO books (title, publication_year, author_id)
VALUES ('Моя книга', 2024, 4);
```

Этап 3: UPDATE

```
UPDATE books
SET publication_year = 1867
WHERE title = 'Война и мир';

UPDATE books
SET title = title || ' (классика)'
WHERE author_id = (
    SELECT author_id FROM authors
```

```
    WHERE author_name = 'Федор Достоевский'
);
```

Этап 4: DELETE

```
DELETE FROM books
WHERE title LIKE 'Евгений Онегин%';

DELETE FROM books
WHERE publication_year < 1850;
```

[Вставьте скриншот: результат DELETE]

Этап 5: TRANSACTION

```
BEGIN;

INSERT INTO authors (author_name)
VALUES ('Л.Н. Толстой');

UPDATE books
SET author_id = (
    SELECT author_id FROM authors WHERE author_name = 'Л.Н. Толстой'
)
WHERE author_id = (
    SELECT author_id FROM authors WHERE author_name = 'Лев Толстой'
);

DELETE FROM authors
WHERE author_name = 'Лев Толстой';

COMMIT;
```

Этап 6: RETURNING

```
INSERT INTO authors (author_name)
VALUES ('Антон Чехов')
RETURNING author_id, author_name;
```
